

# Q1 Did the course (text/video lectures, demo videos, etc.) cover the content you were expecting?

Answered: 58 Skipped: 0

	IT WAS INSUFFICIENT.	(NO LABEL)	(NO LABEL)	(NO LABEL)	THE CONTENT WAS GREAT!	TOTAL	WEIGHTED AVERAGE
☆	5.17%	1.72%	5.17%	22.41%	65.52%	58	4.41
	3	1	3	13	38		

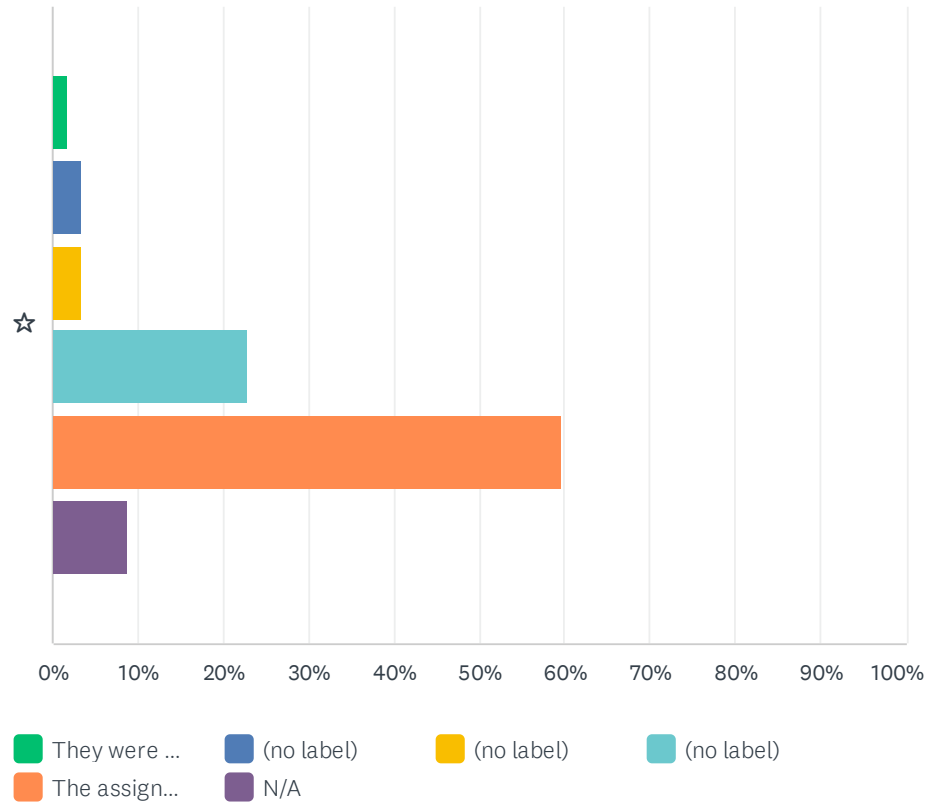

#	MORE DETAILS:	DATE
1	I would expect more information/guidance in Threat Modeling topic.	8/19/2022 7:44 AM
2	Excellent survey of secure software dev.	8/6/2022 12:18 PM
3	too few examples, names of tools	7/30/2022 6:18 PM
4	No soy desarrolladora de software pero con lo que he leído, me he hecho una idea general.	7/28/2022 11:40 AM
5	Very detailed, a lot of topics covered in an easy to understand form. Even for someone already familiar with the domain, there were many new things I haven't come across earlier	7/27/2022 2:54 PM
6	Very detailed explanation of vulnerabilities	7/13/2022 7:00 AM
7	I'm not a developer but I work with a team so this was helpful for me to understand a lot of what they are doing/discussing. It was written at a high enough level I could mostly keep up with the points.	6/28/2022 1:31 PM
8	Wonderful course	6/21/2022 11:17 AM
9	It provides the basic view on what a developer should focus on for securing their code	6/16/2022 5:58 AM
10	This course is not for my skills.	6/14/2022 3:48 AM
11	I didn't know about some of the stuff covered in the course and really enjoyed the full course.	6/13/2022 1:35 PM

## LFD121 Course Completion Survey

12	increase the sensibility for security on web-applications	6/1/2022 2:03 AM
13	Yes. I am an experienced product security manager and I found the content to be a great overview and refresher. This is a great training course for new initiates and more experienced engineers, managers.	5/11/2022 10:56 PM
14	It's clear that the writers know their subject matter very well because they're able to explain it in clear, simple language.	5/4/2022 9:18 AM
15	It was extremely enlightening. The course material was informative, and I have read most of the links provided or saved them for future reading. I did need to supplement some of the course material with external articles, videos and explainers, especially around the cryptography module.	5/2/2022 4:07 PM
16	The course adequately explained the common vulnerabilities in softwares, how to avoid and mitigate attacks and best practices in developing more secure applications.	4/25/2022 9:37 AM
17	I think the topic is very important, but the course failed to delivered it because it tried to cover too much and too high-level. It was also lacking of relevant examples; It kind of felt like draft - lot of copy pasted text, irrelevant questions, bad UX, lot of marketing jargon; The current format is not suitable for day-to-day practitioners, it is more suitable for managers or government officials to learn jargon and get some high-level picture; I would really split the course into smaller parts and cover topic that's relevant for software engineering - small nuances between CWE, CVE etc is not relevant and knowing acronyms is not helpful if someone have to take over 15years old project; I would like see actual bug reports, videos that demo real CVEs in actions, examples how fuzzing helps to find vulnerabilities and it would be nice to see some code snippets; I would really split the course into smaller parts and cover only topic that's relevant for software engineering - small nuances between CWE, CVE etc is not relevant and knowing acronyms is not helpful if someone have to take over 15years old project;	4/23/2022 11:41 AM
18	Thank you	4/9/2022 9:05 AM
19	Loved this course	3/31/2022 7:27 AM

## Q2 Were the course assignments (knowledge checks, hands-on labs/exercises, if applicable) useful?

Answered: 57 Skipped: 1

	THEY WERE NOT USEFUL.	(NO LABEL)	(NO LABEL)	(NO LABEL)	THE ASSIGNMENTS WERE GREAT!	N/A	TOTAL	WEIGHTED AVERAGE
☆	1.75%	3.51%	3.51%	22.81%	59.65%	8.77%	57	4.48
	1	2	2	13	34	5		

#	MORE DETAILS:	DATE
1	Me han servido para afianzar algunos conceptos.	7/28/2022 11:40 AM
2	There were no hands-on labs/exercises	7/27/2022 2:54 PM
3	Knowledge checks were helpful, but there weren't labs or interactive exercises - that might have been insightful.	6/28/2022 1:31 PM
4	I did had several questions that i disagreed with the answer. for example in Knowledge check 12.3: "who or what decides how fast..." the answer you gave was the D that attackers. that is incorrect. there are many factors. Option A is better.	6/21/2022 11:17 AM
5	This course is not for my skills.	6/14/2022 3:48 AM
6	Sometimes too trivial or too misleading	6/5/2022 4:22 PM
7	Good knowledge base for using on futured projects	6/1/2022 2:03 AM
8	Test Your Understanding questions were too simple.	5/15/2022 10:35 AM
9	yes, the quizzes helped reinforce the lessons and they were challenging enough, not too easy	5/11/2022 10:56 PM

## LFD121 Course Completion Survey

	not too difficult.	
10	They were a bit conventional but good.	5/4/2022 9:18 AM
11	Many of the knowledge checks may have been too easy..	5/2/2022 4:07 PM
12	Short answer: no, mostly because due to confusing UI; Some questions were about topics that were not covered or removed; Too many questions didn't test knowledge - some question were just plain confusing (e.g multiple selection or none) or some question were about plain trivia which are not relevant for secure programming - CVE vs CWE is not important for developers; It was not possible to review answers before submitting; I would adds some example for ReDoS and make the text more readable;	4/23/2022 11:41 AM
13	Thank you	4/9/2022 9:05 AM

### Q3 What improvements can we make to this course (visual design, interactivities, multimedia)?

Answered: 33 Skipped: 25

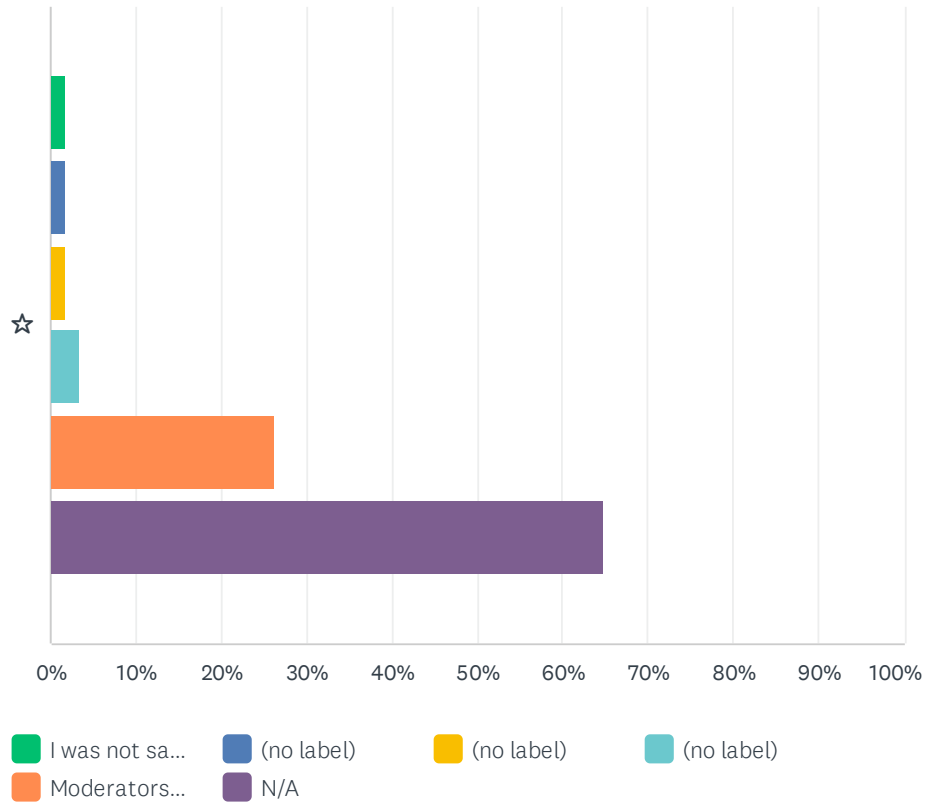

#	RESPONSES	DATE
1	A way for me to put highlights and notes like I can do in Amazon kindle. This will make it easy for me to revise prior to taking the exam. I did take notes as an alternative but having this feature within the Web app will be helpful.	8/23/2022 12:24 AM
2	Multimedia or videos	8/16/2022 11:07 AM
3	N/A	8/7/2022 3:35 PM
4	Maybe a few interactive elements would improve it, but the text is very complete.	8/6/2022 12:18 PM
5	1. video 2. more examples 3. more tools names	7/30/2022 6:18 PM
6	Poder hacerlo en otros idiomas. Como mejora propongo que se haga también en Español.	7/28/2022 11:40 AM
7	Content could be expanded further. I'd love to see real code examples of vulnerabilities in various programming languages. Also, something like an example of vulnerability + fix applied (in form of code diff view?) - that would be great. Ideally when a real life examples could be used (from real vulnerabilities reported with commits containing fixes from actual projects repositories?)	7/27/2022 2:54 PM
8	This is not specific to the current course and it is really not critical: there is a lot of interesting and useful references (links) to read (articles related to use cases...), or to bookmark for future usage (OWASP to 25, etc...). A single "references" page that summarize all references would be nice.	7/27/2022 5:11 AM
9	multimedia	7/25/2022 2:34 PM
10	In this course-webapplication the lightbulb (image) is referenced from wikimedia but wikimedia is not in the allowed img-src CSP.. which actually might be a good test/idea to have in the course.	7/21/2022 9:19 AM
11	Additional diagrams would help to digest some of the more complex topics.	7/18/2022 3:54 PM
12	reference more elaborated	7/13/2022 7:00 AM
13	Add some visual aids. The course is ok, but has a LOT of text	7/5/2022 7:16 PM
14	Add some video content just to break up the reading.	6/28/2022 1:31 PM
15	add videos and maybe some hands-on labs for the vulnerabilities	6/27/2022 3:39 AM
16	The textual content is too much and hard to keep the attention. Some more graphs and illustrations would be great.	6/22/2022 8:08 PM
17	See answer above	6/21/2022 11:17 AM
18	it's really well done already congrats	6/16/2022 6:32 AM
19	This is good for now, in the future it would be good to focus on specific type of weakness and how they can be addressed effectively in code	6/16/2022 5:58 AM
20	More videos, code examples	6/15/2022 1:58 PM
21	This course is not for my skills.	6/14/2022 3:48 AM
22	Instead of reading only texts, I think some (short) videos will be helpful to make the course more interesting.	6/13/2022 1:35 PM
23	Literally anything but blocks of mundane text.	6/9/2022 2:08 PM

## LFD121 Course Completion Survey

24	Tight the first chapter. More examples in second chapter	6/1/2022 2:03 AM
25	Course progress doesn't update on home page	5/15/2022 10:35 AM
26	It would be great if the open source / github repo of the course content was split up by section/chapter instead of one huge markdown doc.	5/11/2022 10:56 PM
27	I noticed a few small bugs: * Chapter 6 Part 2: Implementation, "Part 2 Overview" incorrectly includes "Input Validation Basics" as the last unit (it is a unit of chapter 7, where it is listed). * Chapter 10, Sending output, "Countering Cross-Site Scripting: The XSS Problem": typo in the note at the bottom of the page, it's XSS not XXS	5/7/2022 11:18 AM
28	Some of the longer modules felt very long. Maybe you could give them some variety by including a video here and there.	5/4/2022 9:18 AM
29	I would have enjoyed some more video content, or hands on exercises. I know those may be difficult in a language-agnostic course.	5/2/2022 4:07 PM
30	The course menu button needs to be more responsive for mobile users.	4/25/2022 9:37 AM
31	Some video would be helpful; it was very difficult to read long texts; I would split the course into separate courses that could cover topics bit more deeper than just snippets from wikipedia or OWasp article; I would rethink which part is actually relevant for software engineers and which topic would bring biggest return and actually helps to avoid insecure software; I would like see real bug reports, videos that demo real CVEs in actions, examples how fuzzing helps to find vulnerabilities and it would be nice to see some code snippets; I would get rid of questions that test some non-relevant trivia about key lengths which change with each release; The course mentioned many best-practises, but never referred any source or backstory - for example, why ArgonID2 is better than bcrypt and what's the tradeoffs how other solutions were broken and why salting is bad idea now; etc	4/23/2022 11:41 AM
32	In my case, I would like to see a variation between text and videos. Cause sometime it can be daunting to read all this texts. ;)	4/20/2022 6:04 AM
33	In good shape	4/9/2022 9:05 AM

## Q4 Were you satisfied with the support provided by forum moderators?

Answered: 57 Skipped: 1

	I WAS NOT SATISFIED.	(NO LABEL)	(NO LABEL)	(NO LABEL)	MODERATORS WERE VERY HELPFUL!	N/A	TOTAL	WEIGHTED AVERAGE
☆	1.75%	1.75%	1.75%	3.51%	26.32%	64.91%	57	4.45
	1	1	1	2	15	37		

#	MORE DETAILS:	DATE
1	N/A	8/7/2022 3:35 PM
2	No he utilizado el foro.	7/28/2022 11:40 AM
3	course details entailed	7/13/2022 7:00 AM
4	This course is not for my skills.	6/14/2022 3:48 AM
5	I did not use the forum	4/20/2022 4:19 PM
6	Thank you	4/9/2022 9:05 AM

## Q5 Did you find the training platform easy to use (navigation, functionality)?

Answered: 57 Skipped: 1

	IT WAS NOT USER-FRIENDLY.	(NO LABEL)	(NO LABEL)	(NO LABEL)	THE TRAINING PLATFORM WAS GREAT!	TOTAL	WEIGHTED AVERAGE
☆	3.51%	1.75%	12.28%	33.33%	49.12%	57	4.23
	2	1	7	19	28		

#	MORE DETAILS:	DATE
1	N/A	8/7/2022 3:35 PM
2	Session was a little bit too short which causes constant logouts after just a couple of minutes of inactivity.	7/27/2022 2:54 PM
3	linear study pace	7/13/2022 7:00 AM
4	Kept timing out on me - I guess I'm a slow reader! Even if I was moving around in the screen (scrolling up/down) I still got frequent 2-minute warnings.	6/28/2022 1:31 PM
5	I disconnected quickly and when relogin it often took me back a couple of lessons	6/16/2022 6:32 AM
6	I think it is better if the user is allowed to switch between the questions in a quiz with more than one questions.	6/13/2022 1:35 PM
7	Make sure the whole text of all assignments are visible. Improve usage on mobile devices (menu button overlapping with text)	6/5/2022 4:22 PM
8	TOC Navigation was so tiny	5/15/2022 10:35 AM
9	It kept taking me back several lessons behind even after I had already finished those lessons	5/10/2022 11:34 PM
10	There are a few bugs: * the idle session timeout function appears to be broken, it pops up in the middle of a session, it looks like the timer is not reset on every page that is loaded. * after	5/7/2022 11:18 AM

## LFD121 Course Completion Survey

a session times out, and one logs back in, one is not redirected to the place where one was in the course, but rather a page from sometime before that. The progress indicators next to each link work, though, so it is not hard to find your place again.

11	It's very difficult to understand when question expects multiple answers or none at all; Long text are very hard to read on computer screen; Some content is hidden behind some drop-down or flip-over box; It is not possible to review answer before submitting and it would be good to know which answers were wrong and why;	4/23/2022 11:41 AM
12	Thank you	4/9/2022 9:05 AM

## Q6 What did you like best about this course?

Answered: 58 Skipped: 0

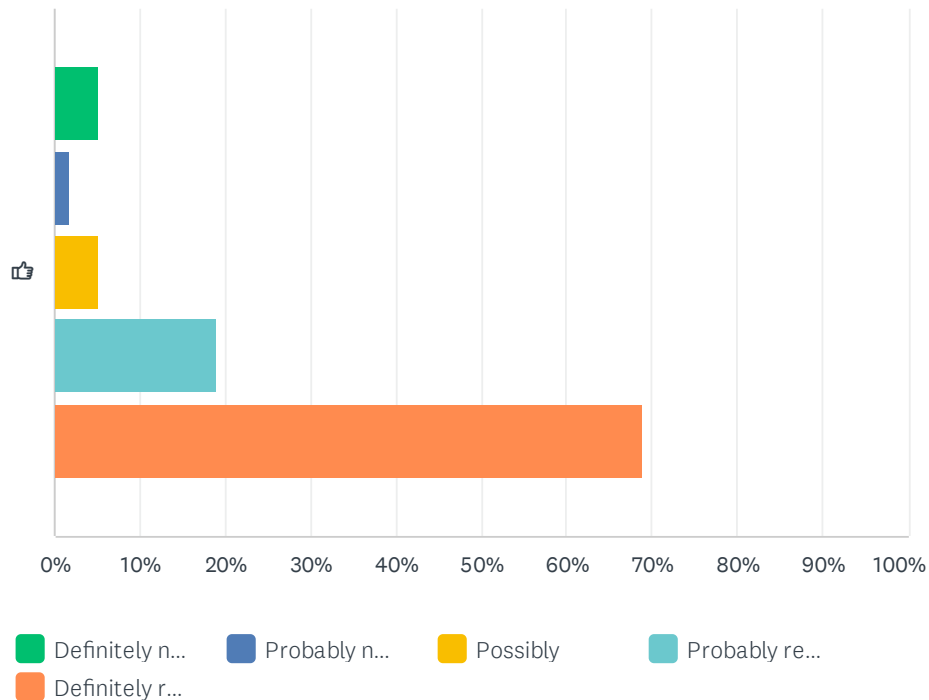

#	RESPONSES	DATE
1	Opened my eyes to the huge area of software security in a very accessible way. The course explained complex concepts such as cryptography in easy to understand terms. Ultimately the course will help me be more conscious of security concerns throughout SDLC.	8/23/2022 12:24 AM
2	content	8/22/2022 4:29 AM
3	Content	8/22/2022 2:35 AM
4	It has a lot of external links, so I could easily do more research in topics what I interested more. I liked the xkcd pics especially. :)	8/19/2022 7:44 AM
5	.	8/17/2022 4:40 AM
6	I learn about how to implement secure software.	8/16/2022 11:07 AM
7	The course is updated, I liked the references and real examples.	8/7/2022 4:32 PM
8	N/A	8/7/2022 3:35 PM
9	Nice overview of secure software development that will help me work with my team to improve the security of our products.	8/6/2022 12:18 PM
10	.	8/1/2022 4:25 AM
11	thank you!	7/31/2022 5:21 AM
12	Attack list examples for developers. The list is extendable (for example Unicode attack). There should be more examples of how to avoid attacks.	7/30/2022 6:18 PM
13	Además de las explicaciones, los enlaces a otros sitios o documentos que permiten ampliar conocimiento.	7/28/2022 11:40 AM
14	Content is very well prepared, it's easy to read, follow and understand. The structure of the course is very good and logical. The balance between raw theory (specs, documents etc.) and practical information is also pretty good	7/27/2022 2:54 PM
15	I really enjoyed the occasional "story time" breaks where the abstract concepts were couched in reality with an illustrative example!	7/27/2022 1:13 PM
16	A progressive, well structured and very comprehensive approach. Thank you.	7/27/2022 5:11 AM
17	course is clear and provided the information required	7/25/2022 2:34 PM
18	Good writing, up-to-date content, no belittling. Thanks!	7/21/2022 9:19 AM
19	The course was detailed and descriptive with relevant examples	7/20/2022 10:31 AM
20	Fantastic explanations and very in depth.	7/18/2022 3:54 PM
21	vulnerabilities and CVSS	7/13/2022 7:00 AM
22	Broad View of security	7/10/2022 7:21 AM
23	The depth with which all topics were addressed	7/5/2022 7:16 PM
24	Easy to pick up where you left off; quick tests to break up the reading, links to lots of pertinent information. I didn't branch to read them but I want to go back and look up a lot of the articles.	6/28/2022 1:31 PM
25	it cover the material very well	6/27/2022 3:39 AM
26	It covers a vast area in security, within a reasonable time.	6/22/2022 8:08 PM
27	I loved the encryption chapter. excellent explanations.	6/21/2022 11:17 AM

## LFD121 Course Completion Survey

28	It's a good overview to put in everyone hands	6/16/2022 6:32 AM
29	The structure of this course is great. Was able to connect the topics with each other while gaining confidence on how to secure the code	6/16/2022 5:58 AM
30	The content is great	6/15/2022 1:58 PM
31	This course is not for my skills.	6/14/2022 3:48 AM
32	The up-to-date content (e.g., materials, extra links, real-world examples, etc.) and scope of the course.	6/13/2022 1:35 PM
33	Questions that actually pertained to the learning material.	6/9/2022 2:08 PM
34	Develop secure	6/8/2022 6:59 PM
35	Great for developers	6/7/2022 5:26 AM
36	Nothing in particular.	6/6/2022 3:15 PM
37	Broad range of topics	6/5/2022 4:22 PM
38	chapter cryptography	6/1/2022 2:03 AM
39	The content is precise and upto the task.	5/31/2022 3:54 AM
40	How it covered many subject and was easy to approach as a security specialist with no former programming training.	5/26/2022 7:01 PM
41	the content	5/20/2022 3:48 AM
42	Relevant content for anyone involved in DevSecOps	5/16/2022 7:32 AM
43	Broad coverage of topics.	5/15/2022 10:35 AM
44	I liked how the course materials were supplemented with links to really great references, blog articles, and examples of recent noteworthy security vulnerabilities and incidents.	5/11/2022 10:56 PM
45	The real world examples made it more clear to understand.	5/10/2022 11:34 PM
46	High quality content, good overview. Thanks!!	5/7/2022 11:18 AM
47	Very informative and gives at least some exposure to a huge range of important topics	5/4/2022 9:18 AM
48	The scope of material was broad, and engaging	5/2/2022 4:07 PM
49	.	4/27/2022 11:33 AM
50	It provided a more structured way of thinking about software security	4/27/2022 7:31 AM
51	The course was straight forward and easy to understand especially it's practical nature. The story section was also insightful.	4/25/2022 9:37 AM
52	It's important topic; Free	4/23/2022 11:41 AM
53	The fact that it is a free online curse and has a lot of important information. It is a very good curse.	4/21/2022 5:31 AM
54	It take the right amount of time with the right amount of information, knowledges and reference to have a good base understanding of cybersecurity	4/20/2022 4:19 PM
55	The content and suggestion about how we as developer can create more secure software.	4/20/2022 6:04 AM
56	Video captions	4/9/2022 9:05 AM
57	Introduction to cyber security.	4/1/2022 4:23 PM
58	Great materials	3/31/2022 7:27 AM

## Q7 Would you recommend this course from The Linux Foundation to colleagues or friends?

Answered: 58 Skipped: 0

	DEFINITELY NOT RECOMMEND	PROBABLY NOT RECOMMEND	POSSIBLY	PROBABLY RECOMMEND	DEFINITELY RECOMMEND	TOTAL	WEIGHTED AVERAGE
👍	5.17% 3	1.72% 1	5.17% 3	18.97% 11	68.97% 40	58	4.45
